

MATHEUS CAMPOS

Data & AI Analyst | Data Engineering & IT Governance

Itajuba, MG - Brazil | campos98matheus@gmail.com | +55 (35) 98422-8704 | linkedin.com/in/matheus-campos-it | github.com/matheuscampos-it

PROFESSIONAL SUMMARY

Data & AI Analyst with a Bachelor's degree in Information Systems and a Postgraduate Specialization in IT Governance (expected May 2026). Officially recognized as a Google Student Ambassador in Brazil (2026) focused on Generative AI (Gemini) and digital transformation. Proven track record in building automated Python data pipelines connected to multi-tenant REST APIs and LLM agents (scaling production throughput from 12 to 133 reports/month), optimizing high-volume production SQL databases (eliminating full table scans and timeouts), designing executive Power BI dashboards, and assisting in SecOps cloud governance (AWS EC2/RDS).

PROFESSIONAL EXPERIENCE

Data & AI Analyst / Data Engineer

2024 — Present

Corporate Tech & Enterprise Solutions Firm (Production Environment)

- Automated AI & Data Pipelines:** Designed and implemented Python (Pandas/openpyxl) data pipelines integrated with multi-tenant REST APIs and LLM agents for automated report generation, scaling monthly output from 12 to 133 reports with zero downtime.
- SQL Query Tuning & Production Database Performance:** Performed performance troubleshooting and query rewriting on high-volume production MariaDB/PostgreSQL databases, eliminating full table scans and reducing timeouts to milliseconds.
- Executive BI & Data Visualization:** Cleansed, transformed, and normalized unstructured data sources to build interactive executive Power BI dashboards using advanced DAX metrics and Power Query ETL.
- Cloud Governance & SecOps Support:** Assisted in IAM access governance restructuring, endpoint hardening, and email authentication security (SPF/DKIM/DMARC) on AWS cloud environments.

IT, Data & BI Analyst

2023

Inowatt Soluções Eletrotécnicas

- Business Intelligence & Analytics:** Developed executive Power BI dashboards for financial and operational tracking; normalized complex technical data sources.
- IT Infrastructure & Support:** Maintained internal network infrastructure, automated spreadsheet reconciliations, and managed database backups.

IT Support Intern

2020 — 2022

Prefeitura Municipal de Piranguinho

- IT Operations & Technical Support:** Provided N1/N2 end-user support, local network maintenance, user account administration, and backup verification.

HONORS & TECHNICAL LEADERSHIP

- Google Student Ambassador in Brazil (August — December / 2026):** Selected for an official Google tech leadership program. Hands-on immersion in Generative AI (Google Gemini), Google Workspace ecosystem, and technical community devlogs.

EDUCATION

Postgraduate Specialization in IT Governance

Expected: May 2026

Unyleya University — Focus on Data Governance, IT Risk Management, and Information Security

Bachelor of Science in Information Systems

Graduated in 2023

FEPI — Faculty of Applied Social Sciences of Itajubá — Core curriculum in Database Architecture, Software Engineering, and Data Analysis

TECHNICAL SKILLS & CORE TECHNOLOGIES

- Python (Pandas, openpyxl)
- LLM Agents (Gemini API, OpenAI)
- Advanced SQL (PostgreSQL, MariaDB)
- Query Optimization & Tuning
- APIs REST
- Power BI (DAX, Power Query)
- Data Normalization
- AWS (EC2, RDS, IAM)
- Docker
- n8n Low-Code
- IT Governance
- Linux / Shell
